

INTEGRATED MANAGEMENT SYSTEMS QUALITY POLICY

Andrew Walter Constructions are committed to the total integration of the quality, safety and environmental functions and to achieving and maintaining certification status to the National and International standards of:

- ❖ Quality Management System Standard ISO 9001:2008.
- ❖ Environmental Management System Standard ISO 14001:2004.
- ❖ Occupational Health and Safety requirements of AS/NZS 4801:2001.

Objective

The objective of the development and implementation of this system is to ensure that:

- ❖ Customer requirements are achieved, in both quality and performance.
- ❖ Products and services are provided for in the safest most cost-effective manner with due regard for the environment.
- ❖ Improvement opportunities are identified and implemented to increase company profitability in a responsible manner.

Commitment

Andrew Walter Constructions is committed to:

- ❖ Providing for the efficient use of natural resources within the Civil Contracting Industry and minimising the impact that these industries have on the environment.
- ❖ Establishing an Integrated Management System that provides a framework for setting and reviewing quality, environmental and OHS&R objectives and targets.
- ❖ Understanding our customer requirements through regular contact and strive to exceed those requirements.
- ❖ Protecting the environment through appropriate planning and execution of work activities.
- ❖ Minimising waste and pollution through efficient use and disposal of all resources.
- ❖ Undertaking our work in accordance with relevant Federal, State, Local Government legislation and any other requirements such as standards codes of practice, etc.
- ❖ Communicating information to all employees throughout the Companies on all Occupational Health and Safety, Rehabilitation, Environmental and Quality issues.
- ❖ Establishing and maintaining a workforce that recognises the importance of quality, the environment and occupational health and safety through regular training and induction.
- ❖ Providing for a continual improvement process that will result in a working environment that is safe for all employees and associated parties and is environmentally responsible.
- ❖ Providing support for employees injured while carrying out alternative and meaningful duties.
